RE: EQT Production Company
Revisions - Initial Compliance Report - 40 CFR 60 Subpart 0000a
0000a Reporting Period: August 2, 2016 - August 2, 2017
Revisions - Annual Compliance Report - 40 CFR 60 Subpart 0000
0000 Reporting Period: October 15, 2016 - August 2, 2017

To Whom It May Concern:

EQT Production Company (EQT) is submitting revised attachments for the annual compliance report for affected facilities subject to New Source Performance Standards (NSPS) 40 CFR 60 Subparts 0000 and 0000a. This letter includes revised Attachment 1 and Attachment 4 information to replace the attachments included in the report dated October 30, 2019. Additionally, this report includes a deviation that was discovered when updating the affected facilities.

The revisions are for collection of fugitive component affected facilities. After additional review of records, it was determined that four well pads: Anderson (FOL163), Kuhn (BIG467), Michaels (GLO174), and Jones (GLO173), commenced construction prior to the applicability date of the rule and as such, are not subject to the rule. Also, EQT is clarifying that surveys completed when well pads were shut in did not deviate from the monitoring plan.

During the review, EQT determined that one well pad Conley (PFS28) was not included in the prior report as the well pad was shut in during the reporting period. Even though the well pad was shut in, there is no exemption from fugitive emissions surveys under 0000a. As such, EQT is noting a deviation from the survey requirements.

Should you have any questions regarding this report, please contact me by phone at (412) 395-3654 or by email at MSowa@eqt.com.

Respectfully,

Mark Sowa
EQT Corporation
